Amended Carlsbad Energy Center Project (07-AFC-06C)

Karen Douglas, Commissioner and Presiding Member, Andrew McAllister,  
Commissioner and Associate Member California Energy Commission 1516 Ninth  
Street  
Sacramento, CA 95814-5512

Regarding the Petition to Amend-Below Grade Conduit Installation

As an intervener, Terramar, would like to make a motion that this Petition be heard at a regularly scheduled business meeting of the Energy Commission for the following reasons:

- 1) During the hearings, Power of Vision supported by Terramar, undergrounding of cables was suggested. Now there is a request for an amendment by the Applicant to underground a certain cable. Terramar would like staff and the Commission to look into whether there are other cables that could be undergrounded at the same time.
- 2) Also Terramar would like the Commission and staff to consider if there are other places on site where cables could be undergrounded.

Terramar appreciates the Commission considering our motion. Please consider the visual aspects that we must endure with this unnecessary fossil fuel plant, that could have been fulfilled with solar.

Respectfully submitted by, Kerry Siekmann, Terramar
