**Subject: Implementation of Safety Enhancements at SoCalGas Storage Fields**

Today, SoCalGas submitted a letter to the California Public Utilities Commission detailing the company's plans to begin implementing many of the safety enhancements already in place at the Aliso Canyon facility at our three other natural gas storage fields—Playa del Rey, Honor Rancho, and La Goleta. The letter included details of plans to conduct comprehensive integrity inspections and convert all storage wells to flow natural gas only through the inner metal tubing of the well.

By applying the experience and knowledge from Aliso Canyon to each of our other storage facilities, all of the communities that we serve will benefit from the industry-leading technology and infrastructure used to deliver safe, clean, and reliable natural gas to their homes and businesses.

A copy of the letter is attached for your reference. Please feel free to reach out to me with any questions.

Best Regards,

Heidi
