## **IEPR 2017-05-22 workshop and IEPR public comments**

I am writing to ask you to SHUT DOWN the Aliso Canyon gas storage facility in Porter Ranch. This facility is unsafe since it's located in a high fire danger zone and sits on top of active earthquake fault. It is also very close to thousands of homes and several schools in the area. Our community has suffered a lot due to the gas blowout in many ways- mentally, physically and our health has been compromised.

This facility is not needed for energy reliability which is backed up by several engineering studies. The facility continues to leak daily. The gas company keeps threatening the public of a shortage which we have not had any blackouts since the moratorium.

Please do your best to keep the Aliso Canyon gas storage facility closed!!
