Aliso canyon

Aliso canyon is not a safe facility to be located in a resident area where schools are located so close to the storage facility that keeps leaking every day. People here we have the right to live a health life, with out suffering from Asthma, Allergies, rashes, cancer of so many kinds, that is sad seeing people dying every day of cancer due to so many gases that is coming out of all these old wells. We need to change to alternative energy and retired all these old wells. So. Cal. gas needs to really think about people before profit. This facility will never be safe. I'm suffering from Asthma, Allergies, rashes, itch on my body and scalp that drives me crazy. Think about this many lifes you ruined and still you are ruining because we don't have any other place to go. These are our homes that we worked very hard to built and now every thing is gone.
