Subject: Date for HECA Workshop

RE: 08 AFC 8A HECA work shop.
Aug 16, 2013
Docket

Please

HECA Neighbors is concerned about Harvest Activity in conflict with work shop dates. Harvest is an intense time of year for the ag communities of Tupman and Buttonwillow. The work days are long. And it is a hands on time for the farm owners. The property owners most effected by HECA will be involved in almond harvest, pistachio harvest, and cotton picking. Please consider the responsibilities of these property owners at harvest time and their ability to effectively participate in a hearing at the same time.

Almond harvest has begun which extends through September.
Pistachio harvest begins in September and lasts about a month.
Cotton harvest begins in late September and can last a month to six weeks.

Harvest will be substantially completed by mid October.
All harvest should be completed by November 1, 2013

Please keep those dates in mind to allow the property owners the ability to participate in the workshop.

Respectively

HECA Neighbors
Chris Romanini
