Kern County HECA Power Plant

To Whom It May Concern:

We are asking you to deny the permit for the HECA Power Plant that is being proposed in Kern County.

It seems probable that HECA would cause further deterioration of air in Metropolitan Bakersfield. Beside the pollutants released by the gasification of coal and petcoke, the huge amount of traffic generated to transport coal and other products related to the plant is sure to have an adverse effect on local air.

My wife and I are currently suffering nasal and respiratory congestion due to poor air. Please don't not allow this situation to get worse.

We see limited short term benefits from the creation of jobs due to the construction of this plant and very negative long term adverse effects.

Yours truly,

Andrew Honig
