## **Spare the public!**

Please do not allow this plant to proceed. I have lived in this area for 5 years in blissful retirement and learned to love and enjoy the birds, animals and people here. For many years oil and gas have been produced with great success. It has not ruined agriculture or the air quality. The bad days are from air from other areas. If you allow a hydrogen plant, it will be the cause of local contamination.

Save the citizens and wild life of Kern County. Leave our scarce water for us alone, not some unnecessary polluting plant.
