## **AGAINST this hydrogen energy plant in Kern County**

Mr. Roberts:

I am not an environmentalist, but I do care about the natural world. I am concerned about diesel trucks coming, by the hundreds, into this area every day. I am concerned about coal being burned in this area. Both of these would contribute to poorer air quality; unhealthy air for people, plants, and animals. I am aware that there are emission controls, but emissions are projected to be zero. I am concerned about the water required for the plant operation. That water needs to be available to farmers and ranchers; they feed this valley and the world. Perhaps a better hydrogen energy plant in the future, but NOT this hydrogen energy plant at this time. please do not allow this to be built here, now.

Thank you for taking the time to read and consider my comments.

Debby Kroeger
