## **Donna Richaud Comments**

*Additional submitted attachment is included below.*

*To California Energy Commission:*

*I, as a taxpayer, am very much opposed to the HECA plant. At first, it sounds good and then as you delve into it further one realizes the ramification: increased air pollution which we already are the leaders in; taking good farm land needed for producing food; and the runoff from the underground coal and chemical waste causing ground water pollution. Enough!!!*

*Please take heed in what the public has to say....don't let money and politics take over what is good for the people as a whole. We don't need this....we are already leaders in producing energy why make us the "guinea pigs".*
