I SUPPORT THE HECA PLAN

California Energy Commission

To whom it may concern,

I would like to express my support for the Hydrogen Energy California project. It really upsets me how there are so many accusations that the project will drink up a bunch of Kern County's water. I looked into it found that they really aren't. It said HECA signed an agreement with the Buena Vista Water Storage District to purchase brackish, non-potable water. I guess brackish water has a lot of dissolved solids that isn't good for farming. The water storage district has even stated that HECA's use of the brackish water is welcomed and is part of their Remediation Program. Since the Buena Vista Water Storage District said HECA was okay, I think any opposition in regards to water use is invalid. These are water professionals who know what they're doing and we should trust them. I ask that you all allow this project to continue on their path to success and approve a permit for the project. Do not be fooled that the opposition may be louder at times, but there is a lot of support for this project in Kern County

thank you.

Jackie
