To whom it may concern,

I support the Hydrogen Energy California Project. HECA is a new and well tested technology that has been proven to work and has been demonstrated as safe and reliable in various places all over the world already. This project could make Kern County a leader in global warming solutions. We can't just pretend that what we're currently doing for energy is sustainable. It's not. Let us progress and support projects like HECA and help our younger generations. Please allow this project to progress and contribute to Kern County.

The CEC approval permit is vital not only to Kern County but the state and nation. Please do the right thing and support HECA and approve the permit so they can get this project started. Thank you.
