my Support

Dear California Energy Commission:

I am in passionate support of Hydrogen Energy California project. HECA is a new but tested technology that is going to bring clean energy to Kern County; a place that we all know has filthy air. But that is what makes HECA so great is that it doesn't dirty the air more. Most of the emission go into the ground and they don't just stay there, they help push out residual oil. This project is perfect for Kern County. Don't stop progress please approve the permitting process and let the jobs, the oil, and the money help continue develop Kern County.

Thank you!
