Heca Support

To whom it may concern,

I don't understand why anyone would want the HECA project built somewhere else. Beside the fact that it is going to bring thousands of jobs to Kern County the Air Pollution and Control District has determined that the project will be safe to the area. I think HECA has been very giving to the community and will lots of cash to our sometimes struggling local economy. HECA is going to put the majority of green house gas emissions into the ground instead of the air and it will help push out oil that is currently hard to get to. I just don't see a downside; Kern County will get lots of money put back in our economy and more jobs. The project will help the local oil industry while also alleviating stress on California's energy grid. I hope that you approve HECA's request for a permit and allow them to continue on their journey to get this project built.
