Opposition to HECA

Additional submitted attachment is included below.

Sept. 7, 2013

Dear California Energy Commission:

I am a resident of Bakersfield in Kern County. I write to voice my opposition to the proposed HECA plant in Taft with the perpetual lack of water in CA, it seems frivolous to use 4800 gallons of water per minute in this facility. Furthermore, Kern County consistently rates as having the worst air quality in the nation. We certainly do not need additional contaminants in our already filthy air! I am from South Florida & saw hundreds of acres of prime farmland lost to development. It would be a shame to risk the loss of our farmland here. Just say no!

Thank you.
