HECA Plant in Buttonwillow

It is a travesty to allow 300 truckloads of coal to be imported into an air basin that is already one of the worst in the nation. Then for the federal government to subsidize this with 500 million dollars is ludicrous. Using up precious farmland, water resources for the benefit of oil companies is just wrong. And it is such a larger facility with technology that has not been proven effective or safe. The truck traffic alone will be a huge pollution problem for the valley and the state. Please stop this disaster before it becomes a national disaster.
