Health hazard, water waster, carbon pollution. Say NO to COAL in CA!

There are four MAIN and several other reasons to reject this project.

1. Carbon pollution. This will be in the top 60 carbon polluters in CA.
2. Use of risky unproven technology.
3. Terrible waste of WATER that our farmers NEED desperately! (Would waste 2.4 BILLION gallons of water yearly!)
4. Health hazard to the MAX in an area that already has questionable air. We are looking at a dangerous increase in pollutants that cause asthma, emphysema, and even heart attacks in a region that already can't come close to meeting the standards of the Clean Air Act.
