In the Matter of:

Docket No. 08-AFC-8A

The Application for Certification for
the Hydrogen Energy California
Project

SIERRA CLUB STATUS REPORT No. 10

Pursuant to the Revised Committee Scheduling Order for the Hydrogen Energy California (“HECA”) project, issued on January 27, 2014, Intervenor Sierra Club respectfully files this Status Report No. 10.

Since the last status report, Sierra Club has submitted comments to the Commission regarding the proposed Wasco terminal expansion and California’s severe drought conditions. The supplemental analysis for the Wasco terminal expansion fails to adequately address health risks and fails to identify significant environmental justice impacts, among other problems.

Sierra Club is pleased to hear that Staff is preparing a dry cooling alternative analysis and awaits further critical information from the applicant and OEHI regarding this project.

//

//

Given the complexity of issues to be resolved and substantial bulk of still outstanding information, Sierra Club continues to request that Staff prepare a revised Preliminary Staff Assessment.

Dated: March 4, 2014

Respectfully submitted,

Signed:
