## **Background**

The NSHP is part of a comprehensive statewide solar program known as the California Solar Initiative. The NSHP provides financial incentives to encourage the installation of eligible solar energy systems on new residential construction located in specified investor-owned utility territories. The NSHP seeks to achieve 360 megawatts of distributed solar photovoltaic electric capacity by the end of 2016.

Since the program began in 2007, Energy Commission staff has received many comments from stakeholders to streamline the program. Energy Commission staff held a workshop on August 6, 2013, to present considered revisions and solicit public comments. Staff considered the public comments and incorporated them as appropriate into the staff draft of the *NSHP Guidebook*.

On October 18, 2013, the staff draft of the *NSHP Guidebook* was posted for public comment. Eight stakeholders submitted comments. As appropriate, staff incorporated the stakeholder comments. These changes are reflected in the *NSHP Lead Commissioner Draft Guidebook*.

The minimum guidelines for implementing California's solar energy system incentive programs, including the NSHP, are identified in the *Guidelines for California's Solar Electric Incentive Programs (Senate Bill 1)* [Murray, Chapter 132, Statutes of 2006, § 4], also known as the *SB1 Guidelines*. The *SB1 Guidelines* include requirements with respect to the *California Building Energy Efficiency Standards* similar to those that are being updated in the *NSHP Guidebook*. It is necessary to make corresponding changes for the *2013 California Building Energy Efficiency Standards* in the *SB1 Guidelines*. These changes are expected to be finalized in the first quarter of 2014.
