Comments Form (RE: Hydrogen Energy California - HECA)

The proposed HECA project that is trying to be approved should not even try to. The whole project has gaps in information and planning; all the way to its core. Although I live in Bakersfield and understand that we are in need of more power. This project in my opinion has no right to claim to be a safe and clean source of energy. It might as well be labeled as a experiment project since its to first to be build. Kern Country should not be a guinea pig.
