Docket Number: 08-AFC-08A

Comments in Support of Motion to Terminate (Part 9)

Attached are the names of 6,982 Californians, who together submit the following comment in support of Sierra Club and other intervenor's motion to terminate this proceeding.

Subject: Terminate the proceeding reviewing the Hydrogen Energy California project

Dear California Energy Commission,

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Additional submitted attachment is included below.

California Energy Commission

Subject: Terminate the proceeding reviewing the Hydrogen Energy California project

Dear California Energy Commission ,

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,
David Almada

Dear California Energy Commission ,

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

IN ADDITION - you MUST put a stop to unrestrained residential and commercial growth amidst this terrible drought crisis. The REDONDO BEACH city council recently ignored scores of local citizens and approved 10 2,400+ sf condo homes where a small community church once sat, and the Mayor (Aspel) vetoed a proposal to put a HUGE waterfront development on the ballot. This waterfront development will require huge amounts of water for its homes, offices, hotels and commercial establishments - - ALL THE WHILE THE REST OF OUR COMMUNITY ANS STATE ARE BEING TOLD TO LET OUR GRASS AND GARDENS "GO BROWN".

The linkage between money and policy IS ALL TOO CLEAR. People are giving up on hope of an honest, responsible and responsive government. I/we challenge you to take on the responsible position and related actions NOW. Otherwise, you will look just like all the rest.

Thank you for taking the time to listen.

Sincerely,
Paul Schlichting

Subject: Terminate the proceeding reviewing the Hydrogen Energy California project

Dear California Energy Commission ,

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,
Carmen Guerra

Subject: Terminate the proceeding reviewing the Hydrogen Energy California project

Dear California Energy Commission ,

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,
John Weatherman

California Energy Commission

Subject: Terminate the proceeding reviewing the Hydrogen Energy California project

Dear California Energy Commission ,

My family pleads with you to conserve our state's water and not allow it to be polluted by HECA. This is of utmost importance to the people of California.

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,
Jennifer Schilling

Dear California Energy Commission ,

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,
Laura Rasmussen

Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,
James Johnson

California Energy Commission

Subject: Terminate the proceeding reviewing the Hydrogen Energy California project

Dear California Energy Commission ,

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,
Ronald Kelley

California Energy Commission

Subject: Terminate the proceeding reviewing the Hydrogen Energy California project

Dear California Energy Commission ,

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,
Sarah-Jane Owen

Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,
Irene Lizardi

California Energy Commission

Subject: Terminate the proceeding reviewing the Hydrogen Energy California project

Dear California Energy Commission ,

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,
Terry Dycus

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,
Cyrille Autin

Dear California Energy Commission ,

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,
Seamas Odirain

Subject: Terminate the proceeding reviewing the Hydrogen Energy California project

Dear California Energy Commission ,

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,
Dylan Orbach

California Energy Commission

Subject: Terminate the proceeding reviewing the Hydrogen Energy California project

Dear California Energy Commission ,

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,
Mickael Belot

We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,
Anne Clark

Subject: Terminate the proceeding reviewing the Hydrogen Energy California project

Dear California Energy Commission ,

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,
Thomas Kendrick

California Energy Commission

Subject: Terminate the proceeding reviewing the Hydrogen Energy California project

Dear California Energy Commission ,

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,
Donald & Diane Lahti

Subject: Terminate the proceeding reviewing the Hydrogen Energy California project

Dear California Energy Commission ,

When I'm cutting back severely on m own water use and urging all my friends and neighbors to do the same, how can you even think about a project like this? Especially when it would also increase air pollution! I'm appalled!

In the strongest possible terms, I urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,
Sid Johnson

California Energy Commission

Subject: Terminate the proceeding reviewing the Hydrogen Energy California project

Dear California Energy Commission ,

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,
Kathy Diehl

Dear California Energy Commission ,

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,
Brian Dowling

Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,
Suzanne Van Der Kuil Kabbara

California Energy Commission

Subject: Terminate the proceeding reviewing the Hydrogen Energy California project

Dear California Energy Commission ,

I'm writing to urge the California Energy Commission ("CEC") to terminate the proceeding reviewing the Hydrogen Energy California project. For more than a year, the developer has failed to respond to staff inquiries for more information about water use, greenhouse gas pollution and more.

California is in the midst of the worst drought in state history. We simply cannot afford to hand over 7,500 acre-feet of water every year when that water could provide critical supply to local farmers. Furthermore, without a clear and enforceable agreement to sequester the greenhouse gas pollution, the project cannot be built according to state law.

The time has come to close the book on this dirty and dangerous proposal. The developer either cannot resolve these critical issues and/or has ceased efforts to address them. I therefore urge the CEC to terminate the proceeding and prioritize other projects that can move the state in the direction of a truly clean energy future.

Sincerely,
Julie Donoho
