Exhibit C

STATE OF CALIFORNIA

Energy Resources Conservation and Development Commission

In the Matter of:

Docket No. 08-AFC-8A

The Application for Certification for the
Hydrogen Energy California Project

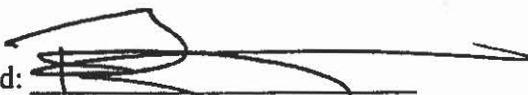

**DECLARATION OF BEAU ANTONGIOVANNI IN SUPPORT OF JOINT RESPONSE
OBJECTING TO APPLICANT'S REQUEST FOR SUSPENSION**

I, BEAU ANTONGIOVANNI, declare as follows:

1. HECA has been in the application process with the CEC since 2008. In that time I'm sure they have spent hundreds of thousands if not millions of dollars pushing there plant for approval. They have lawyers, scientists, and public relation personal that are well funded with public money to do whatever they can to get this project approved. The local constituents near the proposed site have limited time and resources to dedicate in order to present our facts and concerns on how this project will affect us. If the project were passed, as proposed by HECA, we have reason to believe that there could be serious repercussions for lives and property values in the surrounding area. This has caused many of us to put segments of our lives and businesses on hold. We expected to have to deal with this process for a couple of years and were prepared to spend some of our own time and money to voice our concerns, but the longer this application is extended the more our resources are depleted and when we no longer have the time or money to sit at the table during the process we fear the scales of justice will swing towards those with the deepest pockets. Please deny HECA's request to suspend the application for six months and bring this project up for a vote as soon as possible. If they still don't have a viable plan after seven years I don't think they are capable of running a project of this magnitude.

I declare under penalty of perjury that the foregoing is true and correct to the best of my knowledge and belief.
