December 13, 2015

I am to the opinion that HECA is just as bad as any "Terrorist Threat". Putting the CO2 gas underneath such a virulent plant, is nothing short of suicide. It could take out the "Oilpatch" and probably half of Bakersfield, CA.

It is also very accessible to Interstate I-5. How easy it could be for "Terrorist" to target it !!!

Not only do they purpose to use all of OUR water; now they are going to totally pollute it underground with the CO2 gas.

(Those pipes have been known to leak in other parts of the U.S.A.)

I live very, very close to this "monster" to be! I feel as though my Country has turned against TUPMAN, CA. and the surrounding farming communities. You are acting worse than "Terrorist" if you permit this atrocity to be built.

Page 2 December 13, 2015

If HECA is built and they are permitted to bury the CO2 gas then the truth of its destruction will be known; as we little people of TUPMAN, CA. will be literally "VAPORIZED"!!! by HECA and our non-caring government

Please take into consideration that HECA and its anchor company SCS Energy LLC, CALIF. and mother-ship in MASSACHUSETTS. Totally feel above all the laws of KERN COUNTY and CALIF.

We and you are a joke to them. They think of you and us as nothing more than a bunch of tree-hugging, dirt-loving, Californians that are standing in the way of their greedy clutches!!!

Tupman is at ground level, as were the TWIN TOWERS of 9-11. We will be blown to bits and pieces, when it blows and it will!!!

December 13, 2015

Or/and, what is going to
push up, spray out etc. from
the underground fissures in
our EARTH; this hasnt been
tested here. This entire area
being "Oil Fields" history is drilled,
pot holes, sumps, hidden
unknown crap, etc. So, I guess
there is no danger of fugitive
gases or toxics, waste ever
surfacing. BULL

Have a conscience please!
Please send HECA back to where
it came from!

That would be HELL!!

I'm Sure
