## **Objection to HECA Reinstatement**

I live in Bakersfield and near the proposed plant. I am alarmed at the poor air quality that already exists in Kern county. The proposed plant will add to poor air quality because the HECA owner cannot guarantee that the waste product for manufacturing urea for fertilizer will not escape into the air or pollute ground water. The plant is not needed and there is no market for the product. The project wastes limited federal dollars needed for critical projects like roads, bridges, etc. The project has the potential for negative health impacts for all people near it and especially poor people who lack the ability to move away or receive adequate health care due to the plan's potential for pollution. Please reject the applican's request and deny any further consideration of the project.
