Commercial Hydrogen Measurement Codes and Standards Update

September 29, 2009

John Mough

CA Division of Measurement Standards

Transition from Demonstration Stations to Commercial Stations: Establishing National and State Codes (Fuel Dispensing Device Requirements; Method of Sale; Fuel Quality)

- US National Work Group (USN WG): Proposes Codes to National Conference on Weights and Measures (NCWM)
- NCWM: Reviews and Votes to Approve National Codes
- States: Adopt Codes by Law or Regulation

Transition from Demonstration Stations to Commercial Stations: Establishing National and State Codes (Fuel Dispensing Device Requirements; Method of Sale; Fuel Quality)

- ASTM D03.14 Committee

- SAE J2719 Committee

- ISO 14687-2

Transition from Demonstration Stations to Commercial Stations: California Division of Measurement Standards (DMS)

- April 2009: AB 118 Investment Plan included \$3.5 M to DMS to research fuel dispensing device test standards and methods, fuel sampling procedures and laboratory techniques for fuel quality analysis
- Interagency agreement between CEC and DMS being finalized
- Next Investment Plan:
 - Validation of Analytical Procedures
 - Research New Dispenser Technologies
- Establish Funding Source for Alternative Fuels Oversight
