Good Morning Dale,

Per the TSE-7 condition of certification, please see attached for a copy of the notice of synchronization letter the client has sent to CAISO as required 7 days prior to synchronization. In addition, CAISO will be contacted by telephone one day prior to synchronization. This submittal supersedes the previous one made on 10/31/2014. Please contact me if you have any questions.

Regards,

Steven Pochmara - Permit Manager

**Subject:** VIS-01-02-00

Good Afternoon Dale,

Please see the attached package that includes colored photographs taken from KOP 's (Key Observation Points) 1-7a, 7b as specified in the VIS-1 compliance. All listed above ground structures and buildings have been completed and are ready for visual inspection . As discussed, we will coordinate a site visit with you and your visual staff near the end of next month.

Regards,

Steven Pochmara - Permit Manager

| COMPLIANCE-12                    | OPI                 | Submit Updates of Contingency Plan to CEC as Necessary                               | The project owner, in consultation with the CPM, will update the on-site contingency plan as necessary. The CPM may require revisions to the on-site contingency plan over the life of the project. In the annual compliance reports submitted to the Energy Commission, the project owner will review the on-site contingency plan, and recommend changes to bring the plan up to date. Any changes to the plan must be approved by the CPM. The on-site contingency plan shall provide for taking immediate steps to secure the facility from trespassing or encroachment. In addition, for closures of more than 90 days, unless other arrangements are agreed to by the CPM, the plan shall provide for removal of hazardous materials and hazardous wastes, draining of chemicals from storage tanks and other equipment, and the safe shutdown of all equipment. (Also see specific Conditions of Certification for the technical areas of Hazardous Materials Management and Waste Management.) In addition, consistent with requirements under unplanned permanent closure addressed below, the nature and extent of insurance coverage, and major equipment warranties must also be included in the on-site contingency plan. In addition, the status of the insurance coverage and major equipment warranties must be updated in the annual compliance reports. | ACR                                                               | CEC                | AS                  | ASI                    | ASI Staff              | As Req                           | As Req                                                                   | As Req                                                        | -                                   | -                 | -                   |     |
| COMPLIANCE-12                    | OPI                 | Notify Agencies of Unplanned/Temp Closure                                            | In the event of an unplanned temporary closure, the project owner shall notify the CPM, as well as other responsible agencies, by telephone, fax, or e-mail, within 24 hours and shall take all necessary steps to implement the on-site contingency plan. The project owner shall keep the CPM informed of the circumstances and expected duration of the closure.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | within 24 hours of unplanned temporary closure                    | CEC, SBCFD         | AS                  | ASI                    | ASI Staff              | As Req                           | As Req                                                                   | As Req                                                        | -                                   | -                 | -                   |     |
| COMPLIANCE-12                    | OPI                 | Present Permanent Closure Plan                                                       | If the CPM determines that an unplanned temporary closure is likely to be permanent, or for a duration of more than 12 months, a closure plan consistent with the requirements for a planned closure shall be developed and submitted to the CPM within 90 days of the CPM's determination (or other period of time agreed to by the CPM).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | within 90 days of CPM determination                               | CEC                | AS                  | ASI                    | ASI Staff              | As Req                           | As Req                                                                   | As Req                                                        | -                                   | -                 | -                   |     |
| COMPLIANCE-13                    | OPI                 | Submit Proposed Closure Plan to CEC that also includes Permanent Measures            | Unplanned Permanent Closure/On-site Contingency Plan. The on-site contingency plan required for unplanned temporary closure shall also cover unplanned permanent facility closure. All of the requirements specified for unplanned temporary closure shall also apply to unplanned permanent closure. In addition, the on-site contingency plan shall address how the project owner will ensure that all required closure steps will be successfully undertaken in the event of abandonment. In the event of an unplanned permanent closure, the project owner shall notify the CPM, as well as other responsible agencies, by telephone, fax, or e-mail, within 24 hours and shall take all necessary steps to implement the on-site contingency plan. The project owner shall keep the CPM informed of the status of all closure activities.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 60 days prior to commercial operation                             | CEC                | AS                  | ASI                    | ASI Staff              | 5/1/2014                         |                                                                          |                                                               | -                                   | -                 | -                   |     |
| COMPLIANCE-14                    | PC, CONS, COMM, OPI | Petition CEC for any Post Cert Changes per Title 20                                  | Post Certification Changes to the Energy Commission Decision, Amendments, Ownership Changes, Staff Approved Project Modifications and Verification Changes. The project owner must petition the Energy Commission pursuant to Title 20, California Code of Regulations, section 1709, in order to modify the project (including linear facilities design, operation or performance requirements, and to transfer ownership or operational control of the facility. It is the responsibility of the project owner to contact the CPM to determine if a proposed project change should be considered a project modification pursuant to section 1709. Implementation of a project modification without first securing Energy Commission, or Energy Commission staff approval, may result in enforcement action that could result in civil penalties in accordance with section 25534 of the Public Resources Code. (See CEC)                                                                                                                                                                                                                                                                                                                                                                                                                                                | As required                                                       | CEC                | A/T + AS            | ASI                    | ASI Staff/ A/T         | As Req                           | As Req 7/20/11                                                           | As Req 5/22/13                                                | -                                   | -                 | -                   |     |

| AQ-16                            | CONS        | Inspection and Maintenance Plan to include:<br>a. All pumps, compressors and pressure relief devices (pressure relief valves or rupture disks) shall be electronically, audio, or visually inspected once every operating day.<br>b. All accessible valves, fittings, pressure relief devices (PRDs), hatches, pumps, compressors, etc. shall be inspected quarterly using a leak detection device such as a Frobbers CVA 108 calibrated for methane.<br>c. Inspection frequency for accessible components, except pumps, compressors and pressure relief valves, may be changed from quarterly to annual when two percent or less of the components within a component type are found to leak during an inspection for five consecutive quarters.<br>d. Inspection frequency for accessible components, except pumps, compressors and pressure relief valves, shall be increased to quarterly when more than two percent of the components within a component type are found to leak during any inspection or report.<br>e. If any evidence of a potential leak is found, the indication of the potential leak shall be eliminated within 7 calendar days of detection.<br>f. VOC leaks greater than 10,000 ppmv shall be repaired within 24-hours of detection.<br>g. After a repair, the component shall be re-inspected for leaks as soon as practicable, but no later than 30 days after the date on which | The project owner shall establish an inspection and maintenance program to determine, repair, and log leaks in HTF piping network and expansion tanks. Inspection and maintenance program and documentation shall be available to District staff upon request. a. As part of the Annual Compliance Report the project owner shall include information on operating emission rates to demonstrate compliance with this condition.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | ACR                                       | CEC                |                   | AS                     |                        |                                  |                                 |                                |                           |                   |                     |     |
| AQ-25                            | COMM & OPS  | Cooling Tower Recirculation Water TDS Content Test Results: Weekly and Quarterly Logs                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | The project owner shall perform weekly specific conductivity tests of the blow-down water to indirectly measure total dissolved solids (TDS). Quarterly tests of the blow-down water will be done to confirm the relationship between conductance and TDS. The TDS shall not exceed 10,000 ppm on a calendar monthly basis.<br><br>The cooling tower recirculation water TDS content test results shall be provided to representatives of the District, ARB, and the Energy Commission upon request.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | As required                               | District, ARB, CEC |                   | A/I + AS               |                        |                                  |                                 |                                |                           |                   |                     |     |

(Title 17 CCR 93115.10(a)(1)).<br><br>At least thirty (30) days prior to the installation of the engine, the project owner shall provide the District and the CEM the specification of the hour meter.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 30 days prior to installation of engine  | District, CEC          | A/I               |                        |                        |                                  |                                 |                                |                           |                   |                     |     |
| AQ-44                              | OPS        | Direct drive fire pump engine                | This new direct drive fire pump engine shall be limited to use for emergency fire suppression, defined as in response to a fire or due to low fire water pressure. In addition, this engine shall be operated no more than 30 minutes in any one hour and no more than 10 hours per year for initial start up testing and compliance demonstrations. Additionally, this engine shall not operate more than the number of hours necessary to comply with the testing requirements of the National Fire Protection Association (NFPA) 25 - "Standard for the Inspection, Testing, and Maintenance of Water-Based Fire Protection Systems," (current edition). The hours of operation for source testing to perform testing on an engine that has experienced a breakdown or failure during testing will not be counted towards either of the allowable annual limits above. There is no limit on engine operation for emergency use. (Title 17 CCR 93115.6(a)(4)).<br><br>Operating Log, Records                                                                                                                                                                                                                                                                                                                                | As required                              | District, ARB, CEC (?) | A/I + AS          |                        |                        |                                  |                                 |                                |                           |                   |                     |     |
| AQ-45                              | OPS        | Sulfur Content & Engine Use                  | The project owner shall maintain a operations log for this unit current and on-site, either at the engine location or at a on-site location, for a minimum of two (2) years, and for another year where it can be made available to the District staff within five (5) working days from the District's request, and this log shall be provided to District, State and Federal personnel upon request. The log shall include, at a minimum, the information specified below:<br>a. Date of each use and duration of each use (in hour);<br>b. Reason for use (testing & maintenance, emergency, required emission testing);<br>c. Calendar year operation in terms of fuel consumption (in gallons) and total hours; and,<br>d. Fuel sulfur concentration the project owner may use the supplier's certification of sulfur content if it is maintained as part of this log).<br><br>The project owner shall submit records required by this condition that demonstrating compliance with the sulfur content and engine use limitations of conditions AQ-42, AQ-44, and AQ-46 in the Annual Compliance Report, including a photograph showing the annual reading of engine hour. The project owner shall make the site available for inspection of records by representatives of the District, ARB, and the Energy Commission. | ACR                                      | CEC                    | AS                |                        |                        |                                  |                                 |                                |                           |                   |                     |     |

| BIO-8   | PC               | the Construction Nest Surveys and Impact Avoidance and Minimization Measures for Migratory Birds. Provide the CEC a letter-report describing the findings of the pre-construction nest surveys, including the time, date, and duration of the survey; identity and qualifications of the surveyor(s); and a list of species observed. If active nests are detected during the survey, the report shall include a map or aerial photo identifying the location of the nest and shall depict the boundaries of the no-disturbance buffer zone around the nest. Additional copies shall be provided to CEC and USFWS. | Submit a report to the CEC, CDFG, and USFWS. This report shall document the results of the inventory and monitoring as described in Page et al. 2010.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 10 days prior to site mobilization                                                               | CEC, CDFG, USFWS  | AS                | ASI                    | MS                    | 8/19/2011                        | 7/1/2011                        | 8/1/2011                       |                                         | -                 | -                   | -   |

| LAND-2         | OPS        | Submit closure plan within 12 months of planned closure.                                                                                                                                                                                                                                | Consistent with the requirements of COMPLIANCE 1.1, incorporate the applicable requirements of the San Bernardino County Development Code section 84.29.060, Decommissioning Requirements, into the AMS Facility Closure Plan, to the extent feasible, and in as much as the county requirements do not conflict with the California Energy Commission's requirements and standards related to the closure of power generating facilities. Consistent with the requirements of COMPLIANCE 1.11, submit the Facility Closure Plan to the CEC.                                                                                                                                                                                                                  | 12 months prior to planned closure/decommissioning                                                                                     | CEC/SBC                                                                                                                                        | AS                  | ASI Staff              | ASI Staff              | As Req.                                                                                                                                                            | As Req.                                                                                                                                                                                                                                                                                                                                             | As Req.                                                                                                                                                                                                                                                                                                    | 1/5/1900                                                                   | -                 | -                   | -   |
| LAND-3         | PC         | Submit final plat to CEC.                                                                                                                                                                                                                                                               | Submit evidence to the CEC, indicating approval of the merger of parcels by San Bernardino County, or written approval of another process that is acceptable to the county. This shall include evidence of compliance with all conditions and requirements associated with the approval of the Certificate of Merger and/or Notice of Lot Line Adjustment by the county. If all parcels or portions of parcels are not owned by the PO at the time of the merger, a separate deed shall be executed and recorded with the county recorder. A copy of the recorded deed shall be submitted to the CEC, as part of the compliance package.                                                                                                                      | 30 days prior to construction                                                                                                          | CEC/SBC                                                                                                                                        | AS                  | ASI                    | MS                     | 6/29/2011                                                                                                                                                          | 7/22/2011                                                                                                                                                                                                                                                                                                                                           | 7/28/2011                                                                                                                                                                                                                                                                                                  | 1/5/1900                                                                   | -                 | -                   | -   |

| TL5N-5      | COMM & OPS | Ground All Metallic Objects Within Transmission Line Right-of-Way                                                                                                                                                                                                                    | The project owner shall ensure that all permanent metallic objects within the right-of-way of the project-related lines are grounded according to industry standards regardless of ownership. Transmit to the CPM a letter confirming compliance with this condition.                                                                                                                                                                                                                                                                                                                                                                                                                         | 30 days before lines are energized                                                      | CEC                                                                                                                                                                                                    | A/AT                | Electrical/field       | M K                    | 41548                                                                                                                                                    | TL5N5-00-00 To the CEC 11.06.2013                                                                                                                                                          | TL5N5-00-00 CEC Approval 11.07.2013                                                                                                                                                                                                                  |                                                           | -                 | -                   | -   |  |
| VS-1        | PC         | Vendor Colors of All Structures To Be Provided to CEC                                                                                                                                                                                                                                | At least 90 days prior to specifying to the vendor the colors and finishes of the first structures or buildings that are surface treated during manufacture, the project owner shall submit the proposed treatment plan to the CPM for review and approval. If the CPM determines that the plan requires revision, the project owner shall provide to the CPM a plan with the specified revisions for review and approval by the CPM before any treatment is applied. Any modifications to the treatment plan must be submitted to the CPM for review and approval. The review of any subsequent revisions shall be completed by the CPM within 15 days of receipt of the revisions.          | 90 days prior to specifying colors to vendor                                            | CEC                                                                                                                                                                                                    | A/AT                | Permitting             | S P                    | 5/14/2012                                                                                                                                                | 5/14/2014<br>12/20/2011, rev 1, 26/1/12, rev 2, 4/7/13, rev 3, 8/5/2013, rev 4                                                                                                             | 5/16/2014 VS1-01-08 CEC APPROVAL 1/9/2011, rev 1, 3/14/12, rev 2, 5/3/13, rev 3<br>VS1-01-05 to the CEC 11.08.2013 Approved 11.14.2013<br>VS1-01-06 to the CEC 11.25.2013 Approved 11.27.2013<br>VS1-01-07 to the CEC 12.16.2013 Approved 01.08.2013 |                                                           | -                 | -                   | -   |  |
