RE: Request for Extension of RPS Certification Deadline for Mogul Energy Partners I, LLC
(CEC-RPS-ID No. 60369A)

Dear Mr. Long:

This is in response to Mogul Energy Partners' May 13, 2014 and June 26, 2014 letters requesting extension of the Renewables Portfolio Standard (RPS) certification application deadline for the Mogul Energy Partners I, LLC wind facility. Resolution 14-0422-11, adopted at the Energy Commission's April 22, 2014 Business Meeting, established a process to allow the Executive Director to extend and waive application deadlines for RPS certification in certain circumstances and specified the criteria and process for requesting such extensions and waivers.

Energy Commission staff has reviewed the letters and documentation submitted by Mogul Energy Partners I, LLC pursuant to Resolution 14-0422-11. Based on the financial consequences of not granting an extension, I have determined it is appropriate to grant an extension of the RPS certification application deadline from September 15, 2012 (90 days after the utility contract termination date of June 14, 2012) to March 10, 2014, and to allow the original RPS eligibility date of March 30, 2005 for the Mogul Energy Partners I, LLC facility to be reinstated. Please refer to the attached staff memorandum dated July 14, 2014 for additional information. Staff will revise the RPS Certificate for the Mogul Energy Partners I, LLC facility to reflect reinstated eligibility beginning on March 30, 2005.

I want to take this opportunity to advise you of your responsibility to read the *RPS Eligibility Guidebook* and understand its provisions, eligibility criteria and requirements, including the applicable deadlines and other responsibilities of an RPS-certified generating facility. Failure to do so can jeopardize the eligibility of your facility and the ability of a utility to claim the generation for its RPS obligations. To be notified of proposed and adopted changes to the RPS requirements, join the renewable listserv at:
