*P3. A Description:
This site consists of two features: a historical-period road (Feature 6579) and a metal water storage tank (Feature 6580).
Feature 6579 consists of a segment of asphalt-paved, marked, two-lane historical road that measures 22.4 feet wide and runs southeast to northwest on the southeast side of Highway 177. The road was identified on the 15-minute Coxcomb Mountains (1945) USGS topographic quad. Feature 6580 is a large, metal water storage tank located on the southeastern side of Highway 177. The tank is painted white and is currently in use as a road sign for the Chuckwalla Valley Raceway, but judging by its proximity to the historical CAA Intermediate Landing Field, the tank likely came from that airfield. The cylindrical tank measures 39-1/2 feet long and 9 feet in diameter. It sits atop three concrete footings measuring 8-1/2 by 3 by 2 feet. Another footing sits at the northeast corner of the tank. Considering its broken condition and the breaks on some of the other footings, the footings (and thus the tank) appear to have been moved from another location. A 1-1/4 foot opening on the south side likely allowed the tank to be filled from the top (though the opening is now facing downward). Several valves have been added to the center of the western end. The exterior of the...

DPR523A (1/95)  *Required Information
A1. Dimensions: a. Length 34 m (NW/SE) x b. Width 21 m (NE/SW)

Method of Measurement: □ Paced □ Taped □ Visual estimate □ GPS □ Other:
Method of Determination: □ Artifacts □ Features □ Soil □ Vegetation □ Topography □ Cut bank □ Animal burrow
□ Excavation □ Property boundary □ Other: The site boundary is determined in part by the right-of-way established ...
Reliability of determination: □ High □ Medium □ Low
Explain: The road and tank are clearly distinguishable from surrounding vegetation and topography.
Limitations: □ Restricted access □ Paved/built over □ Site limits incompletely defined □ Disturbances
□ Vegetation □ Other:

A2. Depth: None □ None □ Unknown Method of determination: None

A3. Human Remains: □ Present □ Absent □ Possible □ Unknown

A4. Features:
This site consists of two features: a historical-period road (Feature 6579) and a metal water storage tank (Feature 6580).

Feature 6579 consists of a segment of asphalt-paved, marked, two-lane historical road that measures 22.4 feet wide and runs southeast to northwest on the southeast side of Highway 177. The road was identified on the 15-minute Coxcomb Mountains (1945) USGS topographic quad.

Feature 6580 is a large, metal water storage tank located on the southeastern side of Highway 177. The tank is painted white and is currently in use as a road sign for the Chuckwalla Valley Raceway, but judging by its proximity to the historical CAA Intermediate Landing Field, the tank likely came from that airfield. The cylindrical tank measures 39-1/2 feet long and 9 feet in diameter. It sits atop three concrete footings measuring 8-1/2 by 3 by 2 feet. Another footing sits at the northeast corner of the tank. Considering its broken condition and the breaks on some of the other footings, the footings (and thus the tank) appear to have been moved from another location. A 1-1/4 foot opening on the south side likely allowed the tank to be filled from the top (though the opening is now facing downward). Several valves have been added to the center of the western end. The exterior of the tank is embossed with 1-1/2 inch-spikes.

A5. Cultural Constituents:
No artifacts were noted.

A6. Were Specimens Collected? □ No □ Yes

A7. Site Condition □ Good □ Fair □ Poor
The concrete footings are broken, presumably when the tank was originally repositioned in this location.

A8. Nearest Water: A large, northwest to southeast trending seasonal wash is located nearly one mile northeast of ...

A9. Elevation: 173 m amsl

A10. Environmental Setting:
Soil around the site is a loosely compacted, poorly sorted, sandy gravel. Colorado Desert vegetation consists of sparse saltbush, creosote, rabbitbrush, mesquite, and a few grasses. The site is located on level ground.

A11. Historical Information:
The road was identified on the 15-minute Coxcomb Mountains (1945) USGS topographic quad. The road and the tank appears to be linked to the WWII-era Desert Center Army Air Field, according to previous site records.

□ Post-1945 □ Undetermined

A13. Interpretations:
None

A14. Remarks:
None

A15. References:
None

A16. Photographs: See photograph record
Original Media/Negatives Kept At: 21 W. Stuart Ave, Redlands, CA 92373

P3a. Description
tank is embossed with 1-1/2 inch-spikes. By its dimensions and physical characteristics, it would appear that this tank is the same one recorded as Feature 13 by Yarbrough and colleagues in the 2008 P-33-006836 site record. This tank was located in a different place on the airfield. It would appear to have been moved by Chuckwalla Valley Raceway associates to reuse it as a highway sign. The current project only examines the first 15 meters from the highway edge of pavement corresponding to the Caltrans right-of-way. The road continues beyond the right-of-way to the east for several hundred meters, but these portions were not recorded. No cultural material is associated with these features.

P4. Resources Present
[X] Other (linear)

A1. Method of determination
by Caltrans. The right-of-way extends 15 m from the edge of the pavement. The site continues beyond the right-of-way, but these portions were not recorded. The road was identified on the 15-minute Coxcomb Mountains (1945) USGS topographic quad.

A8. Nearest water
the site.

DPR 523A (1995)

*Required Information*
The resource is the remains of the World War II era (1942-1944) Desert Center Army Airfield. The major elements of the resource are a runway and half of a taxi-way for planes (currently maintained/used as Desert Center Airport), two concrete ramps off a taxi-way, the concrete foundations from buildings built during the period of significance, and large landscape features including a second runway and taxiways/ramps that are still discernable on recent aerial photographs. The removal of historic period buildings when the facility was decommissioned is a significant alteration and, except for the runway and half of a taxi-way used/maintained following decommissioning, the features are either covered in blown sand or overgrown and hardly visible on the ground.

The former Desert Center Army Airfield, including 23 features (runways, taxiways, ramps, building foundations, etc.), was recorded as the result of an 1,100-acre field survey of Chuckwalla Valley Associates, L.L.C.'s property at Desert Center Airport. A portion of the former Desert Center Army Airfield lies outside of the property boundary on the northeast side, including portions of features #19 and #21. The portion outside the property boundary was not field surveyed, and features #19 and #21 were recorded based on historical maps and a recent aerial photograph.

The Desert Center Army Airfield may become eligible for listing on the National Register as a contributor to a district, the World War II Desert Training Center, that has not been fully documented. It appears to be eligible for a separate listing on the National Register because it meets criteria C and D. Feature #1, a garage currently in use, post-dates the decommissioning of the airbase and pre-dates 1986 (based on historical and USGS maps), but may have been built as early as 1969 when the site was developed as a commercial airport. Feature #1 does not appear to contribute to the National Register eligibility of the airbase. Features 2-23, however, date from the World War II era (based on historical maps) and appear to be contributors to the National Register eligibility of the airbase.

B7. Moved? □ No □ Yes □ Unknown Date: N/A Original Location: N/A
B8. Related Features: Desert Center Army Air Field features 1 and 3-23

B10. Significance: Theme: U.S. Army desert warfare training Area: U.S. Army Desert Training Center
Period of Significance: World War II, 1942-1944 Property Type: Army Airfield
Applicable Criteria: C and D (Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

Concrete incinerator with metal piping and a scatter of mid-20th-century refuse. Refuse includes blue and aqua glass shards and bottles, burned domestic animal bone, and metal runway weights. The incinerator is approximately 11 m long, 4.5 m wide, and 3 m high, and in poor condition. It was probably built by the U.S. Army and used for refuse disposal by Army Air Base personnel in 1942-1944.

B11. Additional Resource Attributes: (List attributes and codes) HP34, HP39, AH4, AH16

B13. Remarks:
Some refuse dumping may have occurred after the Air Field was decommissioned and when the area was used for farming.
