RE: General Plan Update

Dear Mr. Harry L. Englebright & Citizens Advisory Committee (CAC)

June Guidotti (Bonnici) has used her property for the agricultural grazing of sheep and cows. Her future plans are to continue this practice.

In addition, she proposes to construct a research project the study the production and quality value of feed grains produced from an acerbic and/or pyrolysis system. Feedstock to be considered in the project are sugar beets, green waste, corn, wheat, cannery waste, brewery waste, and other available by-product or agricultural product sources. It is estimated that the research project would be sited on approximately 20 acres.

In 1993, she proposed to site a Waste To Energy (WTE) plant on her property. **See Solano Garbage Company Landfill Environmental Impact Report dated January 1993, Page 3-27 (5) Bonnici Project. A portion of the reserved project will also involve the production of energy from waste by-products. This project is similar to what UC Davis is presently using.

Her property has been in her family for 5 generations. It is safe to say that her property is, and should be, considered "grandfathered" in all aspects regarding agricultural, land use, water, and no limits should be placed on this parcel. Her property is located in the buffer zone as outlined in the Suisun Marsh, as adopted by the State Legislature.

The permits, "Certification of Qualifying Status of a Small Power Production Facility" (18 C.F.R. §381.505(a)); and, "Certification of Qualify Status as a Cogeneration Facility" (18 C.F.R. §381.505(a) Ms. Guidotti is seeking may not be necessary because of research.

She requests that her land use be accordingly revised so that there will be no restrictions on her anticipated activities.

Sincerely,

WILLIAM S. REUSTLE
