<b>DOCKET</b> 08-AFC-11
DATE _____
RECD. DEC 29 2011

Dan,

Thanks for your comments regarding the project. They did miss an earlier deadline, self-imposed, regarding a PPA. This is a business decision by the developer rather than a regulatory requirement on the part of the Energy Commission. The developer has not withdrawn the project, nor is it currently suspended by the Energy Commission. We are awaiting an indication from the developer regarding their intentions.

Regards, bobw

Mr. Worl,

Allow me to introduce myself. My name is Dan Broadwater, Business Manager of IBEW Local 180 and former Vacaville City Planning Commissioner. I was on the Commission when CPV Vaca Station came before us in Vacaville. I was hoping you could shed a little light on the likelihood of this project becoming a reality. I had heard that CPV missed their deadline to procure a PPA for the site. There has not been a lot of news with regards to this site locally and I fear that it may be dead on arrival. Please share your thoughts on the site and if there is anything I or my organization can do to assist, please let me know. Please consider me and the IBEW a resource with regards to any electrical construction items in Napa and Solano Counties. Thanking you in advance for the response,

Dan Broadwater
