Subject: New Docket File for Hydrogen Energy California Application for Certification Amendment

Hydrogen Energy California, LLC has informed staff that it will be filing an amendment to its Application for Certification. This amendment will supersede most previously filed documents in the proceeding. Therefore, in order to avoid any confusion about which documents still pertain to this proceeding, staff believes it is important to establish a separate docket for the new filing. The docket number, however, should remain similar enough to the originally issued number to make clear that this project is a continuation from the previous and not a complete departure. Therefore, staff requests that you open a new docket file for the anticipated Hydrogen Energy California Application for Certification Amendment and recommends that the docket number **08-AFC-8A** be used for this new filing and all subsequent filings made in this proceeding. The distribution list should remain the same as that used for 08-AFC-8. Staff will ensure that any documents filed under the old number that are pertinent to the amended project will be re-docketed with the new number.

Thank you.
