

Hydrogen Energy California (08-AFC-8A)

Occidental Elk Hills Oil Field Enhanced Oil Recovery Plan (EOR)

Staff Data Response and Public Questions and Comments Workshop

Bakersfield California November 7, 2011

Agenda

3:00 PM: Welcome and Introductions

The workshop will follow this format:

- Presentation by Occidental Petroleum regarding Data Responses 1-7 and the EOR plan;
- Discussion between parties and agencies regarding the Data Responses 1-7;
- Public Questions and Comments will follow discussions and questions by parties and expanded general questions and comments may also be raised during the 6:00 PM Public Comment Session of the Workshop.

TOPIC AREAS TO BE DISCUSSED:

1. Occidental Petroleum-Elk Hills presentation of EOR Project and Information provided in Data Responses to questions 1-7;
2. The Enhanced Oil Recovery need for CO₂
3. Discussion of EOR and HECA project greenhouse gases (GHG)
4. OEHI's Monitoring Reporting and Verification Plan: brief discussion of MRV's role
5. OEHI water-related questions—Water flood needs, reinjection of produced water and makeup needs/pumping, and would this water be useful for HECA cooling needs?
6. Permitting Regimen associated with the OEHI EOR project
7. Energy Commission will review the EOR under CEQA as part of the project,
8. Energy Commission will be working with DOE, DOGGR, SJVAPD, and Kern County to prepare the staff analysis;
9. Biology discussion (**must begin about 4:15 PM** for agencies to be available);
10. Public Health, Worker Safety and Fire Protection progress;
11. Air Quality questions not covered during the EOR and GHG discussions;

Dinner Break at 5:30 PM**Public Questions and Comment Period (Begins at 6:00 PM)**
