I object to the way the CEC gave notice of the HECA meeting in Sacramento. How is the public suppose to learn of your meetings? Some got an email dated Sept 19th for "Immediate release" for a Sept 27th meeting. Is this a leagal length of time to give notice to the public? Why is it not readily listed on the CEC Commissions Documents where other improntant infromation is easier for the public to see? You have random letters for easy viewing. Why not this notice? Additionally, It is shameful this meet is not being held in Bakersfield or even in Kern County where the people who are affected live. Over 100 people came to the Tupman meeting. There is a great local interest. You are purposely making it difficult for the public to participate. Please post my objection on HECA 08 AFC 8A.  
Sincerely LaRee Snow
