Arden Wallum, General Manager-Chief Engineer
Mission Springs Water District
66575 Second Street
Desert Hot Springs, California 92240

Dear Mr. Wallum:

Regional Water Leaders invite you to: A WATER CRISIS ROUNDTABLE
and complimentary luncheon

9:00 a.m. – 1:00 p.m. on Friday, February 1, at Casino Morongo

***Please join a frank and open discussion with Regional Water Leaders
Concerning the Worsening Water Crisis in Our Region***

With severe cutbacks of water imported from the Delta simultaneous with a severe drought in the Colorado River Basin, the New Year has dawned with sobering news for local government leaders in Riverside and San Bernardino Counties.

Wracked by nearly ten years of severe drought, water delivery to many farmers in Western Riverside County has been cut by Metropolitan Water District of Southern California by 30 percent. A federal court ruling on endangered species in the Bay-Delta has cut drinking water supplies for this region by another 30 percent.

Our region is facing a very real and growing water crisis. The time has come for a frank and open discussion about the looming challenges facing our communities and the actions leaders should be taking now to avoid more severe impacts later.

You are invited by Riverside County Supervisor Marion Ashley and the General Managers of water agencies providing wholesale water supplies for this region (Inland Empire Utilities Agency, Eastern Municipal Water District, Coachella Valley Water District, San Bernardino Valley and Western Municipal Water District) to attend a Water Crisis Roundtable with local government leaders starting at 9:00 a.m., Friday, February 1, at Casino Morongo. All General Managers and members of city councils, Boards of Supervisors, Planning Commissions, and retail water agencies are encouraged to attend. A complimentary light lunch will be served. Please RSVP to Rebecca Holtzclaw, Western Municipal Water District, at (951) 789-5061 or by e-mail at rholtzclaw@wmwd.com.

An overview of the challenges will be provided from the federal, state, regional and local perspective, followed by a serious discussion about the actions needed in every jurisdiction to ensure our region mitigates the impacts of water shortage as effectively as possible.

Please join us on February 1. Your leadership is needed to help reduce impacts of the worsening water crisis in our region.

Yours very truly,

Steve Robbins
General Manager-Chief Engineer

**TRUE CONSERVATION
USE WATER WISELY**
