**Subject: CPV Sentinel's Proposed Power Plant Project (Facility ID No. 152707), to be located at 62575 Power Line Road, Desert Hot Springs, CA 92440; (07-AFC-3)**

Dear Sir/Madam:

This is in reference to the CPV Sentinel's (CPV) Proposed Power Plant Project Application for Certification (AFC) and the Title V Application for a Permit to Construct filed with the California Energy Commission (CEC) and the South Coast Air Quality Management District (AQMD), respectively. The AQMD issued an Addendum to the Determination of Compliance (ADOC) and a Revision to the ADOC on March 2, and May 12, 2010, respectively.

The purpose of this letter is to make a minor correction to the 30-day average daily emissions calculations for this project. The reason for the correction is that the AQMD had previously calculated the 30-day average daily emissions by mistakenly dividing the maximum monthly emissions by 31 days, instead of the average 30 days. This correction will only impact the offset requirements for Reactive Organic Gases (ROG) in that it will change the total amount of required Emission Reduction Credits (ERCs) to offset the ROG emission from this project from the previously reported 441 pounds per day (lbs/day) to 456 pounds per day. CPV had already provided 412 lbs/day of ROG ERCs, therefore, the remaining balance is 44 lbs/day of ROG ERCs.

This correction does not have any impact on the offset requirements for any other air contaminant and does not change the AQMD's previous determination that the CPV project complies with all applicable air quality rules and regulations. Please contact me at (909)396-2662, if you have any questions.

Sincerely,
