Dale,

Staff prepared the section in house and appear to have gotten the facts wrong on the emergency services. We are checking the AFC/PSA and FSA to see where it went wrong. We will provide comments to the Committee to correct the Proposed Decision to ensure the adopted Final Decision is accurate, provides the services the project requires, and maintains the level of emergency services in the surrounding communities. We would like to work with the County FD to get the correct information and provide that to the Committee. Additionally, we see no problem with you providing comments directly to the Committee so they understand the gravity of issue.

Rick and Geoff will be working with John to correct this. Should they work with you or your staff?

Thanks,

Matt

The worker safety section says that the Palm Springs Fire Department is the AHJ and responding

department. They are not we are, in addition the nearest city and/or county station is several miles away. There was one located on Dillon Rd. about one mile from the site but it was a county station and was closed last year, it was relocated to the City of Desert Hot Springs. How do we comment on the PMPD or do we just handle it through you?

Dale A. Evenson
