Subject: Correction to a staff Status Report #5 regarding San Joaquin Valley Air Pollution Control District events related to the HECA PDOC

Correction to a statement in staff's Status Report #5, of March 2, 2013:

Staff has received corrective confirmation from the Leonard Scadura, SJVAPCD, regarding the Status Report #5. In the section on Agency Coordination contained in staff's status report, the following statement contains an error which is underlined in the section below:

The San Joaquin Valley Air Pollution Control District: The Preliminary Determination of Compliance (PDOC) was issued on February 7, 2013, and filed at the Energy Commission on February 11, 2013. The PDOC contains both a greenhouse gas analysis and the prevention of significant deterioration (PSD) analysis for the HECA project. There will be a 45 day comment period, closing on March 25, 2013. The District has noticed a hearing on the PDOC for April 2, 2013.

Correction: The SJVAPD has extended the comment period on the Preliminary Determination of Compliance to April 17, 2013, based upon their scheduling of the PDOC Hearing. The e-mail from the District is added below, and provides links to the District's website information regarding the PDOC:

Email communication to Robert Worl, from Leonard Scadura, dated 3/12/13:

Bob -

On Page 4 of the status report - http://www.energy.ca.gov/sitingcases/hydrogen_energy/documents/2013-03-01_CEC_Staff_Status_Report_Number_Five_TN-69758.pdf, it says that the public comment period for the PDOC is through 3/25/13.

We have extended this comment period to 4/17/13 due to a public hearing will be having on the PDOC on 4/2/13, see <http://www.valleyair.org/Workshops/postings/2013/4-2-13-S-1121903/02-19-13%20%28S-1121903%29.pdf>.

I suggest on the next "schedule" published for this project, that 4/17/13 be shown as the end of the PDOC comment period.
