Comments on Proposed Palen Solar Draft Supplement EIS

Solar and Wind power are the cleanest form of energy with a fuel costs at zero forever. Cost Vs. benefits analysis for a long term outweigh benefits way much more. For any new project there is always scepticism.

Desert Tortoise, Mohave Fringe Toed Lizards and Birds have survived and adjusted to harshest disturbances by nature in past one million plus years. They will migrate and continue to flourish and survive as they have done in the past.

As long as the company provides enough land for Mitigation Needs, this project should be approved.

500 MW will reduce our daily Oil imports from unstable foreign nations ,reduce pollution and dependency.

Thank you.
