Re: IVANPAH SOLAR ELECTRIC GENERATING SYSTEM

(Docket Number 07-AFC-5)

To whom it may concern,

I am writing as a concerned member of a science class at Saint Leo University in Florida. We studied the proposal in class, and I personally question your rationale in approving the Ivanpah Solar Electric Generating System (ISEGS) project. The project, even with the mitigation measures described in the Decision Report, will have remaining significant impacts on the environment that out weigh the benefits.

My opinion on the solar panels is I feel it's a great idea. Eventually we are going to run out of fossil fuels , and are going to need to use our natural resources like the sun and the wind that we are not going to run out of. I wish it was a different company besides bp, because they did ruin our Gulf of Mexico, and I am a very big ocean person. The spill ruined a lot of peoples lives, and way of living. I just hope it doesn't ruin the dessert and animals. I think they should make it in a way it would work with the animals and nature friendly.

Sincerely yours,
