Re: IVANPAH SOLAR ELECTRIC GENERATING SYSTEM

(Docket Number 07-AFC-5)

To whom it may concern,

I am writing as a concerned member of a science class at Saint Leo University in Florida. We studied the proposal in class. I personally think it is a good idea to put solar panels on the houses because it would save a lot of money. People's energy bills would go down a lot. If Chevron and all the big companies put solar panels up, all the extra energy could be used for other things. Not many people live in the Mojave Wilderness, so it would make sense for them to use the land for solar panels. If the people that lived there cared enough, they could protest or something because it's their land. It would have significant benefits for people and society.

Sincerely,

Julia Cavallo
