

Docket Optical System - Carlsbad Power Plant

From: Joe R <jgr187@att.net>

Subject: Carlsbad Power Plant

Please consider the site proposed by the City of Carlsbad for the new power plant. There is no reasonable explanation for building the plant on the ocean front when there is ample and adequate space in the industrial area to build the plant. The beach front location would damage property values and be a blight to the area.

Thank you for your consideration in this matter.

Docket Optical System - Proposed Power plant Carlsbad Ca

From: Donald Linfesty <linfesty.donald@sbcglobal.net>

Subject: Proposed Power plant Carlsbad Ca

I am writing on behalf of the hundred plus condos that sit as close as 750 feet from the proposed power plant. We would clearly see this plant above the tree line and this would have a negative effect on our property values. We are also concered about the noise the huge air intakes would make. I have been to the meetings on this plant and heard both sides. I feel the city has a good plan that address many factors beyond our concerns. This is prime coastal property and should be used for other than a power plant.
