Purpose

California Energy Commission staff will hold a workshop to discuss appropriate mitigation for significant impacts to cultural resources by the proposed Palen Solar Electric Generating System (PSEGS) project. At the January 7, 2014, Committee Conference, the committee directed Energy Commission staff to further consider, in consultation with the project owner and interested Native American tribes, appropriate mitigation for the significant effects that the proposed amendment would have on what the committee referred to as "tribal interests." The Presiding Member's Proposed Decision was published by the Energy Commission on December 13, 2013, and the "Corrected Transcript of the Committee Conference," was published on January 28, 2014. Both are available for review at:

<https://efiling.energy.ca.gov/Lists/DocketLog.aspx?docketnumber=09-AFC-07C>. This workshop will only cover the topic of the revisions necessary to the proposed license conditions of certification, to be responsive to the committee's direction.

The workshop will have time set aside for members of the public to comment on, or ask questions about, the proposed PSEGS project amendment. Technical or schedule questions should be directed to Christine Stora, Compliance Project Manager for the PSEGS project, at (916) 654-4745, or e-mail her at christine.stora@energy.ca.gov.

Summary of the Proposed PSEGS Project Amendment

The project site is located immediately north of Interstate 10, approximately halfway between the cities of Indio and Blythe, some 10 miles east of Desert Center, in eastern Riverside County, California.

The modifications proposed in the petition include replacing the parabolic trough solar collection system and associated heat transfer fluid with BrightSource's solar tower technology. Heliostats—elevated mirrors guided by a tracking system mounted on a pylon—focus the sun's rays on a solar receiver steam generator located atop a 750-foot tower near the center of each solar field, to create steam to drive a turbine that generates electricity.

Two adjacent solar fields producing 250 megawatts (MW) each are proposed for a combined nominal output of approximately 500 MW. Each of the 250 MW solar fields will have a dedicated tower, solar field/heliostat array of approximately 170,000 heliostats, a dedicated non-reheat Rankine-cycle steam turbine generator/power block and an air-cooled condenser (dry cooling). Both solar fields will share common facilities, including: a common area containing an administration building; warehouse; evaporation ponds; maintenance complex; a meter/valve station for incoming natural gas service to the site; an onsite switchyard; and, a 10-mile single-circuit 230-kV generation tie-line to deliver power to the newly constructed Red Bluff substation immediately south of I-10. Other onsite facilities will include access and maintenance roads (either dirt, gravel, or paved), perimeter fencing, tortoise fencing, and other ancillary security facilities.

Attendance by the Energy Commission's Public Adviser's Office

A representative of the Energy Commission's Public Adviser's Office may attend the workshop and be available to address any questions regarding opportunities for public involvement in the Energy Commission's project review process.

Participation

If you desire information on how to participate in the Energy Commission's review of the proposed project, please contact Alana Matthews, the Energy Commission's Public Adviser, at (916) 654-4489, or toll-free in California at (800) 822-6228, or by email at publicadviser@energy.ca.gov.

To request special accommodations for those persons with disabilities, please contact Lourdes Quiroz, the Energy Commission's Equal Employment Opportunity Officer, at (916) 654-5146, or email at lou.quiroz@energy.ca.gov. For those persons with limited English knowledge, request interpreter services by contacting the Compliance Project Manager, Christine Stora, at (916) 654-4745.

If you wish to provide written comments on the project, please submit them to the Energy Commission Dockets Unit. Please include the docket number (09-AFC-7C) for the

PSEGS in the subject line or first paragraph of your comments. If you wish to submit comments electronically, please provide them as either a Microsoft Word document (.doc or .docx) or in Portable Document Format (.pdf) to docket@energy.ca.gov, and include your name or your organization's name in the file name. If you are preparing non-electronic written comments, please mail or hand-deliver them to:
