DOCKET 07-SPPE-2	
DATE	SEP 23 2007
RECD.	OCT 04 2007

Dear Mr. Boyd,

As CEO of Envirepel Energy Inc., who has worked for four years now to develop an ultra low emissions 90 MW renewable energy project for the 69 KV circuit between the Via Monserate and Pala substations, I would like to submit the following documents to the Commission Staff to review under the Comment process for the Orange Grove Energy Project proposed for the Pala Sub station:

1. Letter of Opposition to this project under Title 20, Appendix B
2. Data Adequacy Worksheet comments for Six Month expedited Process
3. GE LM 6000 Estimated performance data sheet
4. Fallbrook Renewable Energy Facility Executive Summary
5. Emissions calculations for developments within the six mile study area
6. Environmental Impact Reports from some of the surrounding projects

I did not wish to be put into a position to oppose energy generation efforts in support of San Diego Gas & Electric, but after meeting with the developer, they have left our Company no choice.

The State, when given the choice between a viable renewable energy project and a conventional energy project on the same circuit, has an obligation to allow the renewable project priority over the gas fired project in support of the Bio-energy Task force that you personally chair.

I will make myself and my staff available to the Commission to answer any questions resulting from our submission.

Sincerely,

Anthony J Arand
CEO
