To whom it may concern,

My wife and I both are cyclists. We are concerned about the latest project on Brown Road / Old Hwy 395. This road is a very popular route for cyclists as it's far less traveled compared to Highway 395 or 14. Although it doesn't have an established shoulder it's the preferred route to northern destinations. If the Solar Project poses an increase in traffic, especially heavier vehicles, a consideration towards the construction of a shoulder would be greatly appreciated.

Thank you for your time,
