Re: Opposition to the Eastshore Energy Center

Mr. Pfanner:

I am writing on behalf of the Keep Hayward Clean and Green Task Force. We are a task force of volunteers made up of residents and business owners from the City of Hayward. We are tasked with improving the appearance of our City.

Our mission is to preserve the environment and enhance the visual appearance of the City of Hayward through the joint efforts of individual citizens, volunteer groups, businesses, and municipal resources. Our Task Force has recently taken a position in support of the City of Hayward's opposition to the approval and construction of the Eastshore Energy Center proposed by Tierra Energy. The proposed Eastshore plant is not consistent with the goals of our task force. We recommend that it not be built and that future energy needs be met through cleaner energy production and conservation.

We want to add our voice to the many voices raised in opposition to this power plant. We hope that the California Energy Commission will respect the voices of those who will have to live with the impacts of the power plant and choose not to approve this project.

Sincerely,

Kindra Mendall
Chair, Keep Hayward Clean and Green Task Force
