Kelly - I'm passing this on to the Eastshore project manager, Bill Pfanner. This woman is one of hundreds (over 1500) who are concerned about this project. If you have Jacquie's last name it would be helpful.

If this environmental-oriented work in communities interests you let me know and we can talk about openings in Siting which I'm antcipating during 2008.

Good Morning,

Ken Koyama referred me to you, he thought you would be the person to respond to this or at least know who should get it. I spoke to Jacquie last night she feels very strongly about this and she now has my email address:-) She would like a follow up if that is at all possible.

Kelly

I was told that the CEC has final approval of this. Please forward this to the CEC appropriate person to stop this project. The EAST SHORE project will be built right by the Shoreline Bird Sanctuary, Homes and a Community College: this is to the detriment of continued GLOBAL Warming; in fact it is also harzardous to a Flight Path of Planes that fly over this area every day.

I am all for alternate energy. CALPINE is pushing this on the City of Hayward.

Thank you.
