Re; Docket No. 09-AFC-9

Mr . Chairman and Members,

My name is Charles Warren and I am the author of Assembly Bill 1575 which was co-authored by state Senator Alquist and signed into law by Governor Reagan in 1974.

As you know, that legislation established state policies and procedures for the conservation of electrical energy and the development and deployment of means of electrical generation alternative to fossil and nuclear fuels.

It has been called to my attention that a jurisdictional issue of first impression is before you as set forth in the above referenced Docket number. As it involves construction of legislative intent, I have reviewed the (proposed) commission decision and find it fully and fairly consistent with the terms of the Act and in furtherance of its policies

I commend its author and urge its adoption by the Commission.

Respectfully submitted,

Charles Warren
