Subject: Hayward Power Plants

I am writing to let you know I am very much opposed and concerned about the proposed plants in Hayward. At a time when Global Warming is at the tip of everyone's tongue, these companies are trying to ram two highly pollutant power plants down our throats. Why would/should Hayward say yes to pollution in our backyards? Why would/should Hayward carry the burden of these plants just to accommodate overuse of power in other areas? It is my hope that you will oppose these power plants from being imposed on a community unfairly, and oppose the overzealous companies that profit from polluting our earth even in this time when awareness about the severe consequences of toxic emissions is widely known. Please do your part and thank you for your time.
