To whom it may concern:

My name is Sandy Cabrera I'm a south Hayward resident I have been living here for about eight years. I believe you shouldn't build the new power plants in Hayward because it causes too much pollution. Besides this the pollution causes health problems and I don't think a gift certificate can compare to a human's health. The power plants would just let people that aren't conscious about energy saving keep doing the same thing. They won't think about saving energy because they have these two big power plants to take care of their careless energy wasting. Pollution also causes global warming which we can see is causing many deaths probably not all in the bay area but all around the world. All this is because people don't pay any mind to save energy and building two power plants is just giving them another reason not to. Global warming may not be a big problem now but if we want generations after us to have a healthy life we need to start being a little more aware of what decisions we make today. Now more and more kids have asthma due to all the pollution in the air and building two new power plants would just scale the problem and not solve anything. I refuse to the idea of building the power plants hopefully you guys take in consideration where I'm coming from. Please help keep our kids healthy don't build the power plants. Thank you for your time.

Sincerely:

9-17-07

Sandy Cabrera
