

California Energy Commission
Energy Facilities Siting &
Environmental Protection Division
REPORT OF CONVERSATION

File:

Project Title: Colusa Generating Station (06-AFC-9)

(X) TELEPHONE() MEETING LOCATION:

NAME: Ray Green, California Organic Program
Supervisor

TIME: 3:40 pm

DATE: September 10, 2007

WITH: California Department of Food and Agriculture

PHONE (916) 445-3506

ADDRESS:

SUBJECT: Power Plant Impacts on Organic Certification

DOCKET
06-AFC-9

DATE SEP 10 2007

RECD. SEP 13 2007

COMMENTS:

This call was to confirm that organic certification would not be impacted by the air pollutants released from a power plant.

Mr. Green agreed that air pollution from a power plant would not impact adjacent or nearby properties organic certification.

Mr. Green did note that the use of chemicals on the ground near the fence line, such as for weed abatement, could impact organic certification of property directly adjacent to the power plant fence line. In order to avoid that impact either mechanical weed abatement or specific allowable organic chemical means of weed abatement should be used.

COPIES TO:

Jack Caswell
Dockets
