Dear Librarian:

DOCUMENT HANDLING FOR THE FINAL STAFF ASSESSMENT FOR THE PROPOSED PIO PICO ENERGY CENTER (11-AFC-1) and POSTING OF PUBLIC NOTICE

The enclosed Final Staff Assessment (FSA) contains the California Energy Commission staff’s final engineering and environmental evaluation of the Pio Pico Energy Center (PPEC) proposed to be located in the county of San Diego. Please make this FSA available for those who may wish to be informed about the project. We request that you not allow the FSA or any of its contents to be removed from the library. To increase accessibility of the document, we ask, if possible, that you cross reference it as a general reference work under the title and author categories, as well as under such subjects as “Energy Commission,” “electricity energy/generation,” “power plant siting,” or any other relevant subject. Please retain the enclosed letter to the public behind the front cover of the FSA.

The Energy Commission’s siting process is open to the public and incorporates the input of the public as well as local, state and federal agencies. To facilitate public participation in our review process, the Commission distributes copies of staff documents such as the FSA to public libraries in communities near the proposed project, and in major cities throughout the state. As such, please retain a copy of the enclosed Notice of Availability behind the front cover of the FSA and also post a copy of the Notice of Availability in a place conspicuous and accessible to those members of the general public who visit the library.

Thank you for your cooperation. If you have any questions, please contact Eric K. Solorio, Siting Project Manager, at (916) 651-0966 or at the address on this letterhead or by email to esolorio@energy.ca.gov.

Sincerely,

Chris Davis, Office Manager
Siting Office

Enclosures (2):
Notice of Availability of the Final Staff Assessment, and
Final Staff Assessment of Application for Certification (11-AFC-1)

Cc: Docket and Proof of Service List
NOTICE OF AVAILABILITY
FINAL STAFF ASSESSMENT
FOR THE PROPOSED PIO PICO ENERGY CENTER (11-AFC-1)

To: MEMBERS OF THE PUBLIC

This notice is to inform you of the availability of the Final Staff Assessment (FSA) for the Pio Pico Energy Center’s (PPEC) Application for Certification (11-AFC-1). The FSA contains the California Energy Commission staff’s final engineering, environmental and public health and safety evaluation of the proposed PPEC.

The FSA will serve as staff’s formal testimony in evidentiary hearings to be held by the Energy Commission’s Committee assigned to hear this case. The Committee will hold evidentiary hearings to consider the recommendations presented by staff, applicant, interveners, government agencies, and the public prior to proposing its decision. In the last step, the full Energy Commission will issue the final decision.

The California Energy Commission encourages public participation in the review of the PPEC’s Application for Certification (AFC). Technical or project schedule questions should be directed to the Energy Commission’s project manager, Mr. Eric Solorio, at (916) 651-0966 or by email at esolorio@energy.ca.gov.

SUMMARY OF THE PROPOSED PIO PICO ENERGY CENTER
On February 10, 2011, Pio Pico Energy Center LLC submitted an Application for Certification (AFC) to the California Energy Commission seeking permission to construct and operate a nominal 300-megawatt (MW) natural gas-fired simple-cycle generating facility, the PPEC. The current AFC replaces the previously proposed project that was withdrawn on December 10, 2010. The new project site is proposed to be located in an unincorporated area of southwestern San Diego County, known as Otay Mesa.

The PPEC project would be located on approximately 10 acres of disturbed land on the southeast quadrant of the Alta Road and Calzada de la Fuente intersection. The construction lay down (equipment and materials) area is proposed to be 6-acres of an adjacent parcel to the south.

The generating facility would include three General Electric (GE) LMS100 natural gas-fired combustion turbine generators (CTGs), each equipped with water injection to the combustors for reducing production of oxides of nitrogen (NOx), a selective catalytic reduction (SCR) system with 19 percent aqueous ammonia injection to further reduce
NOx emissions, and an oxidation catalyst to reduce carbon monoxide (CO). Thermal energy is produced in the CTGs through the combustion of natural gas, which is converted into mechanical energy to drive the combustion turbine compressors and electric generators. The total net generating capacity would be approximately 300 MW.

ENERGY COMMISSION'S SITE CERTIFICATION PROCESS
The Energy Commission is responsible for reviewing and ultimately approving or denying all applications to construct and operate thermal electric power plants, 50 MW and greater, in California. The Energy Commission's facility certification process carefully examines public health and safety, environmental impacts and engineering aspects of proposed power plants and all related facilities such as electric transmission lines and natural gas and water pipelines. The Energy Commission has a certified regulatory program and is the lead agency under the California Environmental Quality Act (CEQA).

SUMMARY OF CALIFORNIA ENERGY COMMISSION STAFF'S FINAL CONCLUSIONS
Staff concludes that with implementation of staff's recommended mitigation measures described in the conditions of certification, the PPEC would comply with all applicable laws, ordinances, regulations, and standards (LORS). Staff also concludes that for all environmental areas, significant adverse direct, indirect, and cumulative impacts will not occur.

AVAILABILITY OF THE FINAL STAFF ASSESSMENT
You may download a copy of the FSA from the project web site: http://www.energy.ca.gov/sitingcases/piopico/index.html. Copies of the FSA are also available at the Energy Commission's Library in Sacramento, the California State Library in Sacramento, and at public libraries in Eureka, San Francisco, Los Angeles, and San Diego. Additionally, copies of the FSA were mailed to the following public libraries:

<table>
<thead>
<tr>
<th>Civic Center Branch</th>
<th>South Chula Vista Branch</th>
<th>East Lake Branch</th>
<th>Central Library</th>
</tr>
</thead>
<tbody>
<tr>

</tbody>
</table>

Also, a copy of the FSA has been sent to those public agencies that would normally have jurisdiction except for the Energy Commission's exclusive authority to certify sites and related facilities.
PUBLIC RESOURCES, CONTACT INFORMATION AND ADDITIONAL SOURCES FOR INFORMATION

If you desire information on how to participate in the Energy Commission's review of the proposed project, please contact the Energy Commission’s Public Adviser at (916) 653-5898 or toll free in California at (800) 822-6228, or by email at: publicadviser@energy.ca.gov.

To request special accommodations for those persons with disabilities, please contact Lourdes Quiroz at lquiroz@energy.ca.gov or by telephone (916) 654-5146.

For additional information contact Eric Solorio, CEC Project Manager at (916) 651-0966 or email at esolorio@energy.ca.gov.

News media inquiries should be directed to Acting Assistant Director, Adam Gottlieb, at (916) 654-4989, or by email at: mediaoffice@energy.ca.gov.

Sincerely,
